Mental Hygiene Goals and Objectives Form
Onondaga Co Dept of Adult & LTC (70200)
Certified: Roshana Daniel (6/1/17)

1. Overall Needs Assessment by Population (Required)

Please explain why or how the overall needs have changed and the results from those changes.

a) Indicate how the level of unmet **mental health service needs**, in general, has changed over the past year: ○ Improved ◉ Stayed the Same ○ Worsened

Please Explain:
It is difficult to make a meaningful assessment of aggregate change in need across such a broad category of services. Targeted analysis of key indicators using data already available to state agencies, completed as a collaboration between county and state resources, would best answer this question.

b) Indicate how the level of unmet **substance use disorder (SUD) needs**, in general, has changed over the past year: ○ Improved ◉ Stayed the Same ○ Worsened

Please Explain:
As indicated above regarding mental health needs, it is difficult to assess such a broad category. Key indicators related to opioid use and overdose woudl reflect and increase need for services, and substantial efforts have been undertaken to address that need. Current planning priorities include additional steps to respond to opioid use, and recent expansions in medication assisted treatment (MAT) in the region have reduced waitlists and wait times at opioid treatment programs (OTPs) and area clinics.

c) Indicate how the level of unmet needs of the **developmentally disabled** population, in general, has changed in the past year: ○ Improved ◉ Stayed the Same ○ Worsened

Please Explain:

The level of communications and coordination between state and county related to services for developmental disabilities remains limited. We are currently unable to assess changes related to need. Onondaga County is c

2. Goals Based On Local Needs

Issue Category	Applicable State Agenc(ies)		
	OASAS	OMH	OPWDD
a) Housing	☑	☑	☐
b) Transportation	☐	☐	☐
c) Crisis Services	☑	☐	☐
d) Workforce Recruitment and Retention (service system)	☑	☑	☑
e) Employment/ Job Opportunities (clients)	☐	☐	☐
f) Prevention	☑	☑	
g) Inpatient Treatment Services	☐	☐	
h) Recovery and Support Services	☐	☐	
i) Reducing Stigma	☐	☐	
j) SUD Outpatient Services	☐		
k) SUD Residential Treatment Services	☐		
l) Heroin and Opioid Programs and Services	☑		
m) Coordination/Integration with Other Systems for SUD clients	☑		
n) Mental Health Clinic		☑	
o) Other Mental Health Outpatient Services (non-clinic)		☐	
p) Mental Health Care Coordination		☑	☐
q) Developmental Disability Clinical Services			☐
r) Developmental Disability Children Services			☐
s) Developmental Disability Adult Services			☐
t) Developmental Disability Student/Transition Services			☐
u) Developmental Disability Respite Services			☐
v) Developmental Disability Family Supports			☐
w) Developmental Disability Self-Directed Services			☐
x) Autism Services			☐
y) Developmental Disability Person Centered Planning			☐
z) Developmental Disability Residential Services			☑
aa) Developmental Disability Front Door			☐

ab) Developmental Disability Service Coordination ☐ ☐ ☐

ac) Other Need (Specify in Background Information) ☐ ☐ ☐

2a. Housing - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ◉ No

If "No", Please discuss any challenges that have precluded the development of a goal (e.g. external barriers):
A number of the issue categories above have not been designated in relation to an applicable state agency with a goal/outcome. Some of these categories are umbrella items that are infused in a wide range of projetcts and goals. These include Transporation, Recovery and Support Services, Reducing Stigma, etc. As such, a lack of goals associated with a particular issue category should not be interpreted as an indication that the particular issue category is not actively considered within the planning and actions of the Onondaga County LGU. The Onondaga Plan also does not include goals/outcomes related to the majority of the Issues Categories that are not relevant to the needs of individuals and families with Developmental Disabilities. Rather, this is a reflection of our limited opportunity to engage/partner with OPWDD.

Change Over Past 12 Months (Optional)

2c. Crisis Services - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

2d. Workforce Recruitment and Retention (service system) - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

2f. Prevention - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

2l. Heroin and Opioid Programs and Services - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

2m. Coordination/Integration with Other Systems for SUD clients - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ◉ Yes ○ No

Goal Statement- Is this Goal a priority goal (Maximum 5 Objectives per goal)? ○ Yes ○ No

Objective Statement

Change Over Past 12 Months (Optional)

2n. Mental Health Clinic - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

2p. Mental Health Care Coordination - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

2z. Developmental Disability Residential Services - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

3. Goals Based On State Initiatives

State Initiative	Applicable State Agenc(ies)		
	OASAS	OMH	OPWDD
a) Medicaid Redesign	☑	☑	☐
b) Delivery System Reform Incentive Payment (DSRIP) Program	☑	☑	☐
c) Regional Planning Consortiums (RPCs)	☑	☑	☐
d) NYS Department of Health Prevention Agenda	☑	☑	☐

3a. Medicaid Redesign - Background Information

Please see the attachments for background information and additional information.

Do you have a Goal related to addressing this need? ○ Yes ◉ No

If "No", Please discuss any challenges that have precluded the development of a goal (e.g. external barriers):

Change Over Past 12 Months (Optional)

3b. Delivery System Reform Incentive Payment (DSRIP) Program - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ◉ No

If "No", Please discuss any challenges that have precluded the development of a goal (e.g. external barriers):

Change Over Past 12 Months (Optional)

3c. Regional Planning Consortiums (RPCs) - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ○ Yes ◉ No

If "No", Please discuss any challenges that have precluded the development of a goal (e.g. external barriers):

Change Over Past 12 Months (Optional)

3d. NYS Department of Health Prevention Agenda - Background Information

Please see the attachments for background and explainations.

Do you have a Goal related to addressing this need? ◉ Yes ○ No

Goal Statement- Is this Goal a priority goal? ○ Yes ○ No

Objective Statement

Change Over Past 12 Months (Optional)

4. Other Goals (Optional)

Other Goals - Background Information

The Onondaga County Plan does not include OPWDD as an applicable state agency. That is not because these initiatives are not relevant to the needs of individuals and families with Developmental Disabilities. Rather, this is a reflections of the limited oppoortunities to engage/partner with OPWDD as an LGU. As reflected in the attachments. Onondaga County is currently engaged in activities related to all of the issue categories defined within the Goals and Objectived form, with the exception of some of the Developmental Disabilities related goals areas, given the limited access to relevant data, ant the limited opportunities for partnership with OPWDD.
As reflected on the attached Executive Summary.

Do you have a Goal related to addressing this need? ○ Yes ○ No

Change Over Past 12 Months (Optional)

Office of Mental Health Agency Planning Survey
Onondaga Co Dept of Adult & LTC (70200)
Certified: Roshana Daniel (5/2/17)

Consult the LSP Guidelines for additional guidance on completing this exercise.

1. For Criminal Procedure Law 730 Chargeback Budgeting: Please indicate the department within your county that is responsible for budgeting CPL 730 restoration chargebacks.

- [ ] Mental hygiene/community services
- [x] Sheriff/county law enforcement
- [ ] Other

If "other" please indicate how these charges are budgeted

Questions regarding the above survey item should be directed to Hank Hren at hank.hren@omh.ny.gov or 518-474-2962.

2. For Local Administration of the Assisted Outpatient Treatment Program:
a) Please describe the system used in your locality to ensure that petitions are filed for individuals requiring Assisted Outpatient Treatment.
Referrals are submitted to the AOT Coordinator for review. If it is determined that a person meets the criteria for AOT and an AOT court order is needed, the AOT Coordinator works with the Onondaga County Legal Department to file a petition. Once a petition is granted, the AOT Coordinator monitors the court order, as well as meets with the individual and treatment team to decide if an extension of the AOT order is needed. AOT court orders are also received from Hutchings Psychiatric Center and New York State Prisons. Treatment planning for these individuals is done in collaboration with the AOT Coordinator.
b) Please describe the system used in your locality to ensure that such individuals requiring Assisted Outpatient Treatment receive the services included in the AOT treatment plan.
The AOT Coordinator sets up the services in the treatment plan and monitors the court order for compliance. The AOT Coordinator facilitates team meetings that are held at regular intervals throughout the length of the court order. The AOT Team may consist of all or some of the following: the individual on the AOT court order, case manager or ACT, therapist, psychiatrist, parole or probation officer, housing provider, peer support, substance abuse treatment provider, family members or support person, community service providers and the AOT Coordinator.
c) Please list the Care Management Programs your Single Point of Access (SPOA) uses to assign AOT referrals.
CIrcare: Health Homes Case Management and the ACT Team.
Questions regarding this survey item should be directed to Rebecca Briney at Rebecca.Briney@omh.ny.gov or 518-402-4233.

Thank you for participating in the 2018 Mental Hygiene Local Services Planning Process by completing this survey. Any technical questions regarding the online County Planning System,
please contact the OASAS Planning Unit at 518-457-5989 or by email at oasasplanning@oasas.ny.gov

Community Service Board Roster
Onondaga Co Dept of Adult & LTC (70200)
Certified: Gigi Love (5/15/17)

Consult the LSP Guidelines for additional guidance on completing this exercise.

Note: There must be 15 board members (counties under 100,000 population may opt for a 9-member board). Indicate if member is a licensed physician or certified psychologist. Under item labeled "Represents", enter the name of the member's organization or enter "Consumer", "Family", "Public Representitive", etc. to indicate the particular community interest being represented. Members shall serve four-year staggered terms.

2017 Mental Hygiene Local Planning Assurance
Onondaga Co Dept of Adult & LTC (70200)
Certified: Roshana Daniel (6/1/17)

Consult the LSP Guidelines for additional guidance on completing this exercise.

Pursuant to Article 41 of the Mental Hygiene Law, we assure and certify that:

Representatives of facilities of the offices of the department; directors of district developmental services offices; directors of hospital-based mental health services; directors of community mental health centers, voluntary agencies; persons and families who receive services and advocates; other providers of services have been formally invited to participate in, and provide information for, the local planning process relative to the development of the Local Services Plan;

The Community Services Board and the Subcommittees for Alcoholism and Substance Abuse, Mental Health, and Developmental Disabilities have provided advice to the Director of Community Services and have participated in the development of the Local Services Plan. The full Board and the Subcommittees have had an opportunity to review and comment on the contents of the plan and have received the completed document. Any disputes which may have arisen, as part of the local planning process regarding elements of the plan, have been or will be addressed in accordance with procedures outlined in Mental Hygiene Law Section 41.16(c);

The Community Services Board and the Subcommittees for Alcoholism and Substance Abuse, Mental Health, and Developmental Disabilities meet regularly during the year, and the Board has established bylaws for its operation, has defined the number of officers and members that will comprise a quorum, and has membership which is broadly representative of the age, sex, race, and other ethnic characteristics of the area served. The Board has established procedures to ensure that all meetings are conducted in accordance with the Open Meetings Law, which requires that meetings of public bodies be open to the general public, that advance public notice of meetings be given, and that minutes be taken of all meetings and be available to the public.

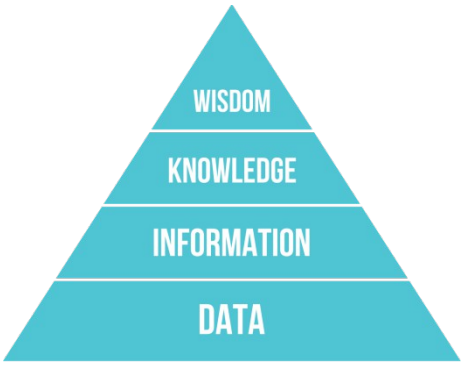
OASAS, OMH and OPWDD accept the certified 2018 Local Services Planning Assurance form in the Online County Planning System as the official LGU assurance that the above conditions have been met for the 2018 Local Services planning process.

2017 Mental Hygiene Executive Summary
Onondaga County Department of Adult and Long Term Care Services

Onondaga County has been working to establish an effective orientation to local/regional planning that recognizes both our limited planning resources, and the changing role of the County Local Government Unit (LGU).

Limited Planning Resources:
Ongoing efforts through the Conference of Local Mental Hygiene Directors (CLMHD) and the state agencies (OASAS, OPWDD, and OMH) have worked to provide access to a range of data sources. Many of these sources are valuable for planning purposes. The challenge arises in considering the ability of Counties to engage with this data in a manner that can drive the planning decisions that are most relevant in the current health care marketplace.

As has been reflected in previous state wide efforts to gather data from local planners, many LGUs prefer a set of canned reports that provide them with a minimum data set of their own data with comparisons from like counties, and trends across time. Rather than access to a wide range of sources that require resources to access, review, prioritize, analyze, etc., a core minimum data set can serve as a foundation to help planners to avoid being lost in data which yields little information. As represented in the (DIKW) pyramid below, the goal is to concentrate our available resources toward a synthesis of core elements that result in the knowledge and wisdom required to drive decisions.



Changing role
As communicated in previous Local Services Plans, Onondaga County LGU continues to work to define and develop our role as a neutral systems broker/ facilitator seeking to enhance access to quality services and supports at the local and regional levels.

Onondaga County continues to seek to utilize resource and partnership opportunities within our county and region to address key needs. Optimal planning efforts involve a primarily data driven orientation that uses data to assess needs, and develops strategies to address those needs. But practical resource limitations dictate that we engage with existing and emerging opportunities in order to effect change. In keeping with this pragmatic approach, Onondaga County seeks to participate in those local and regional activities that provide momentum toward the changes and system enhancements that are aligned with the needs of our community. We seek to take advantage of these opportunities by placing our efforts within these down-stream currents that lead toward progress that aligns with the following values:

Family Focused: Consider all needs within the context of key relationships.
Service Regionalization: Develop and provide services within multi-county care systems.
Integrated care and supports: Support infrastructures and relationships that ensure a holistic orientation to services, including effective coordination of all elements of care.
Recovery: Promote the understanding that individuals can achieve their life goals.
Wellness: Build services that promote well-being, not just the cessation of symptoms/ sickness.
Social Determinants of Health: Address poverty and related factors to support good health.
Disparities/ Disproportionality: Promote interventions that support those groups who are less able to access services, and/or who have poorer outcomes.
Cultural Responsiveness: Ensure that all supports are culturally and linguistically competent, and able to support all populations within the community.
Community Inclusion: Promote the engagement of individuals with the communities in which they live.

An example of this effort to seek down-stream opportunities that align with these core values can be found in our efforts to promote peer services. Currently there are a number of opportunities that Onondaga County is supporting that will help to carry this peer services agenda down-stream. These include the following:

1. BRSSTACS Policy Academy
2. Center of Treatment Innovation (COTI)
3. Regional Crisis Center for Addictions (RCCA)
4. Peer Engagement Service (Local service and regional committee)

These state sponsored projects are promotional of a number of the above values. Onondaga County is engaged in efforts to unite the participants in these projects through our regional Peer Linkage Committee, and will facilitate activities that are designed to ensure that these peer supports are united to achieve a broader scale and deeper impact.

The efforts of Onondaga County LGU to develop this role as a local/ regional broker, within a context of limited resources, has lead us to focus on efforts to develop three core elements to drive our work. Examples of these elements have been attached to this plan for review.

1. County Comparison table
The effort to develop a minimum data set for planning has emerged as an important goal for the Onondaga County LGU. Rather than using our limited planning resources to explore a wide range of sources, we are seeking to consolidate critical data elements into a single spreadsheet that will enable us to do 3 things related to a number of key indicators:

- Regional analysis: We will aggregate our data with that of neighboring counties to develop regional knowledge.
- Like-County comparison: We will compare our data with that of similar sized counties as a first step to deeper analysis. Why are we different? What should/can we change?
- Trends over time: How has our County data changed from year to year? What should/can we do about that?

Our effort to begin to compile this data into a single spread sheet creates a dash board orientation to planning. This single data table, while limited, will serve as an accessible source of data to drive decision making. We are actively seeking to avoid sliding into a pattern of continuous expansion of this table to include an ever increasing volume of data elements. The core question driving the population of this table should be “Is this data critical to creating a compass for planning and decision making, and can we manage/maintain it over time?” and not “Could this data be useful to us?” Almost all data related to the topic under consideration will

have some potential utility. But orienting toward this later question too often results in local planners having access to a fire hose of data which is difficult to manage. Onondaga County's LGU would welcome the opportunity to dialogue with others regarding this effort to optimize a dash board approach to planning data. We seek to avoid a model that involves continuous acquisition of new data sets that tend to grow stale like so many stockpiled foods with a limited shelf life.

As a result of resource challenges, Onondaga County has engaged in modest data analysis over the list 1-2 years. Recent successful efforts to re-establish resources to commit to this task should result in enhanced data analysis going forward. The attached County Comparison Table represents the new approach to data gathering described above, and will be refined over time to create a strong dash board to drive local planning. It will serve to support regional planning, including the work of the Central New York Director's Planning Group (CNYDPG) that includes Cayuga, Cortland, Madison, Oneida, Onondaga, and Oswego counties.

As is often the case this data points us toward some already prioritized concerns, including poverty related challenges to wellness, disparities among ethnic groups, opioid overdoses, and other concerns. Near future efforts will focus on highlighting key data elements that reflect disproportionately high or low numbers compared to like counties and within our region, in order to more effectively target critical needs and coordinate with other counties.

2. 2018 Priority Goals & Priorities Table

Much of the content reflected in the Onondaga County Goals and Objectives Form response is taken from the attached 2018 Priorities List. As reflected above, this list has been generated over time based upon a range of feedback from stake holders, opportunities that have emerged and demanded prioritization, and data from an array of sources.

3. Surveys and focus groups

The unique capacity of an LGU to understand the local culture, market dynamics, and service needs is rooted in relationships with local providers and recipients of services. Onondaga County LGU has developed a plan to survey our CSB and subcommittees on a quarterly basis regarding key issues of concern. Other community stake holders will be incorporated into these survey efforts as appropriate, in order to provide the opportunity for a broader community voice. These surveys will be brief, topical, and timely, so as to address current issues and needs.

In addition to the surveys described above, Onondaga County LGU will also conduct monthly focus groups with a range of community members. These groups will include conversations with all ages (children, youth, adults, seniors) and will be hosted in a range of settings that reflect the values described above. Efforts will be made to avoid a clinical/ pathological orientation to these focus groups. Rather than focusing on whether or not people in a treatment facility have experienced symptom reduction, we will seek to understand the successes and needs of people in the community.

The most recent planning survey used to support the 2018 LSP included an online questionnaire that was provided to the Community Services Board (CSB) and the developmental disability, mental health, and substance use subcommittees. A total of X individuals reviewed the survey with a response of Y (a Z% response rate) While this was a substantial response, the efforts described above to bolster our survey and focus group efforts will result in a substantially enhanced capacity to understand the voice of the community in coming planning cycles. The attached spreadsheet reflects the details of the responses that are summarized below. As reflected in the attachment, respondents continued a trend found in recent data gathering of viewing issues across the spectrum of disability areas (mental health, developmental disability, and substance use).

Respondents were also asked to define the issues according to age ((adult, child, transition aged youth) and according to four key lenses that have been used as a means of ensuring that efforts are consistently made to address these four priorities:

1. Peer and family
2. Regional collaboration
3. Behavioral and physical health integration
4. Health disparities and social determinants of health

The 2017 survey resulted in some key themes that correspond to a significant number of the Onondaga priorities. While a few highlights are described below, readers are encouraged to review all of the responses in the attached document.

Housing: Respondents continue to indicate a high level of need for safe affordable housing, both transitional and permanent. Particular need was expressed regarding housing for women and the homeless.

Workforce Development: Respondents indicated a range of shortages in the human service work force, and were particularly focused upon the need to develop and engage the peer work force. Low pay and a lack of training were cited as reasons for high rates of turnover in entry level direct care positions.

Law Enforcement: More effective collaboration between law enforcement and human services was viewed as important to enhancing safety for recipients and the community at large.

Mental Health Treatment: The need for improved access to traditional services such as psychiatry was noted, as was the need to integrate mental health supports into nontraditional settings such as schools and drop in centers.

Substance Use Disorder Treatment: The need for expanded and timely access to treatment and detox services to support the rise in opioid addiction was cited by a number of respondents.

Health care/ medical services: Respondents reported regarding the need for enhanced access to primary care for those receiving behavioral health services.

Youth services: Respondents described the need for enhanced access to mental health substance use and developmental disability services for youth. Recommended services would enhance access (school and drop in centers) and focus on preventive, treatment, and crisis needs.

Integration of Services:
Perhaps the most common theme among the responses reflected a need for service integration. Many community stake holders have begun to understand that isolated siloes of support have a modest impact. When efforts across a range of support areas are adequately integrated to include health, housing, income, family, and other concerns, interventions can be exponentially more impactful. This survey intentionally asked for “areas of concern” in order to encourage a response that considered a broader approach to wellness. It seems clear that the broader community of stake holders understands that the social determinants of health related to living in poverty are critical to the well-being of service recipients. .

This focus on integrated and coordinated services points logically toward the care coordination resources that have been established to address this need. Much emphasis has been placed upon the function of care coordinators as standing with recipients at the hub of a complex wheel of services, and supporting this system of providers toward effective collaboration. Given the evidence to date, it appears clear that two elements are lacking in our current approach.

1. **Providers are not adequately engaged**: many feel neither motivated nor impelled to work with care coordinators to improve integration of service delivery.

2. **Care coordinators are not adequately supported**: due to large case loads and/or a lack of experience in leading/ facilitating team processes, care coordinators have a limited capacity to do this very central duty.

And so our system must ask itself a core question: If we are going to continue to build our work on a foundation of care coordination, when are we going to adequately resource this function? The larger structure is at risk if we fail to shore up this critical corner stone.

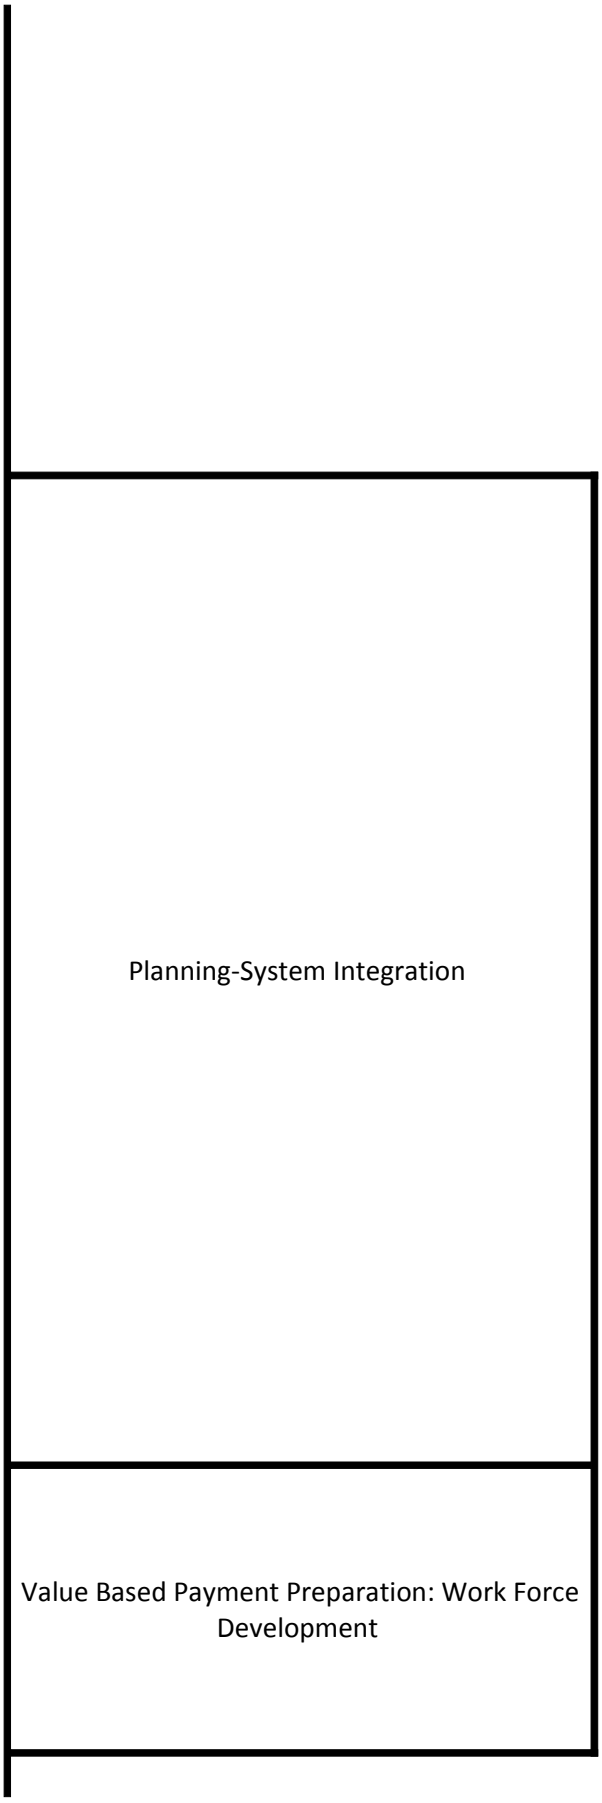
Goals/Area of Concern
Suicide Prevention
Opioid Response
Peer Supports
Access: People to care/Care to people



Planning-System Integration
Value Based Payment Preparation: Work Force Development

Criminal Justice : behavioral health supports

g Term Care Services

Collaboration/community partnerships formed to address concern	Strategies /Action Steps
Onondaga County Suicide Prevention Coalition	Explore how best to serve high utilizers
	Central New York Collaborative Care (CNYCC)-Request for Proposal (RFP)
	Homeless outreach/ engagement (committee work, Rescue mission day ctr, etc)
	Address needs of transition age (16-25)
Drug Task Force and Subcommittee (treatment, prevention, harm reduction)	Increase Medication-Assisted Treatment (MAT)/Opioid Treatment Program (OTP)
Regional Crisis Center for Addition (RCCA)	
Center of Treatment Innovation -Syracuse Behavioral Health (SBH)	
Brining Recovery Support to Scale Technical Assistance Center Strategy (BRSS TACS) Policy Academy	
Drug Task Force and Subcommittee	Expansion and Integration
Center of Treatment Innovation (SBH)	Integrate regional peer resources
BRSS TACS Policy Academy	
Regional Crisis Center for Addition (RCCA)	Maintain 5 day standard for post IP clinic visit
	Optimize length of stay
	Substance abuse services for children and youth
	Transportation
Expand supports for children in foster care experiencing mental health challenges	Monitor compliance of the local Waiver provider agencies with the regulations related to Conflict-free Case Management and Family Choice of service providers.
	Ensure that eligible youth are referred to a Care Management Agency (CMA) that is able to meet their needs.
	Monitor compliance of the local Waiver provider agencies with the regulations related to Conflict-free Case Management and Family Choice of service providers.
School-Based Supports	Prevention services for children & youth
	Increase Crisis services for children & youth: prevent CPEP/ER intervention.
	Expand the current school-based mental health efforts: city to county (multi-tiered system of supports model)

The Senior Health and Resource Partnership Project (SHARP)	Improve service access and sustainment of engagement.
	Workforce training re: social determinants of health/ poverty
RISE Clinic (Refugee & Immigrant Self-Empowerment)	Services in communities of color
Partner with Department of Social Service (DSS)-Economic Security (ES)	Mental Health (MH) First-Aid
Central New York Directors' Planning Group (CNYDPG)	Alignment of LGU planning with the Onondaga County (OC) Health Dept Community Health Improvement Plan (Community Health Assessment (CHA)/Community Health Improvement Plan(CHIP)
Delivery System Reform Incentive Payment (DSRIP) CNYCC	Emergency preparedness: contact list/ mapping (phone, address, leadership) for residential and direct services across 3 areas
Regional Psychiatric Center (RPC)	Refine LGU policy and procedures
Onondaga County Departments (Emergency Preparedness, Health, Children and Family, Social Services)	Enhance utilization of data resources
	Promote emerging role of LGU as neutral systems broker (from statutory authority to unique local/ regional systems broker
	Improve Department of Adult and Long-Term Care (DALTCS) MH web page
	Bolster and engage virtual subcommittees via creation of a quarterly survey agenda
	Develop monthly focus group model: 12 groups per year, including kids, family, adults (range of settings)
	Support the implementation of Health Homes serving children (HHSC): Ensure eligible youth are referred to program and a Case Management Agency (CMA)
RCCA	Integration of Primary care and behavioral health thru the RCCA
DSRIP/ CNYCC participation	Explore how best to serve high utilizers
	Coaching for change seminars
	Workforce training re social determinants of health/ poverty

BRSS TACS Policy Academy	MH/Substance Use (SU) clinic and care management services
	Next steps re: Crisis Intervention Treatment (CIT)
	Vehicles for systems integration
	Prepare and respond to the age for criminal prosecuting to 18. Increase in identified youth with mental health and substance disorders
	Create a more trauma informed service system for youth through ONCare Juvenile
	professionals and families
	Increase awareness and decrease stigma surrounding mental illness
	Equip natural supports with the tools to support youth and their families
	Office of Mental Health (OMH) jail grant

Onondaga County Department of Adult and Long Term Care Services
LGU 2018 priorities

Addressing the **3 disability areas**: MH, SU, DD

Addressing **key lenses**: family, regional, integrated healthcare, recovery, wellness, social determinants, disparities

1 Targeted needs
- suicide prevention
  - CNYCC RFP
  - Onondaga Co. Suicide prevention coalition
- explore how best to serve high utilizers
- homeless outreach/ engagement (committee work, Rescue mission day ctr, etc)
- address needs of transition age (16-25)

2 Opioid response
- RCCA
- drug task force and subcommittee participation (treatment, prevention, harm reduction)
- Increase MAT/ OTP access
- Center of Treatment Innovation (SBH)
- BRSS TACS Policy Academy

3 Peer supports: expansion and integration
- Peer Engagement expansion
- Center of Treatment Innovation (SBH)
- BRSS TACS Policy Academy
- Integrate regional peer resources

4 Access: people to care / care to people
- RCCA
- SHARP
- transportation
- RISE clinic: services for refugee/ immigrant pop.
- services in communities of color
- school based supports
- maintain 5 day standard for post IP clinic visit
- optimize length of stay
- partner with DSS-ES
- MH first Aid

5 Planning
- alignment of LGU planning with the OC Health Dept Community Health Improvement Plan (CHA/CHIP)
- emergency preparedness: contact list/ mapping (phone, address, leadership) for residential and direct services across 3 dis areas
- refine LGU policy and procedures
- enhance utilization of data resources
- promote emerging role of LGU as neutral systems broker (from statutory authority to unique local/ regional systems broker
  - CNYDPG
  - DSRIP CNYCC
  - RPC
- bolster and engage virtual subcommittees
- create quarterly survey agenda
- develop monthly focus group model
- improve DALTC MH web page

6 Value Based Payment prep: work force development
- Integration of Primary care and behavioral health thru the RCCA
- RCCA
- DSRIP/ CNYCC participation
- explore how best to serve high utilizers
- coaching for change seminars

7 Criminal Justice : behavioral health supports
- BRSS TACS Policy Academy
- OMH jail grant
- improve linkage between probation and MH/SU clinic and care management services
- next steps re CIT

This community needs assessment of the New York State Central DSRIP region summarizes specific health care sercice data to identify mental health and substance use disorder treatment needs in the region. The data included are intended to enable planners and others to identify services gaps and disparities and plan for improved service delivery.	

Potentially Avoidable Hospitalizations The Agency for Healthcare Research and Quality (AHRQ) Prevention Quality Indicators (PQIs) are a set of population-based measures that can be used with hospital inpatient discharge data to identify conditions for which good outpatient care can potentially prevent the need for hospitalization, or for which early intervention can prevent complications. PQIs provide a good starting point for assessing quality of health services in the community.Potentially Avoidable Hospitalizations The Agency for Healthcare Research and Quality (AHRQ) Prevention Quality Indicators (PQIs) are a set of population-based measures that can be used with hospital inpatient discharge data to identify conditions for which good outpatient care can potentially prevent the need for hospitalization, or for which early intervention can prevent complications. PQIs provide a good starting point for assessing quality of health services in the community.	
The Observed Rate (per 100,000 people) is the number of PQI discharges divided by the population, multiplied by 100,000.	
The Expected Rate (per 100,000 people) is the number of PQI discharges adjusted by age group, gender and race/ethnicity divided by the population, multiplied by 100,000. Lower ratios of observed to expected rates represent better results.	

contributes to the total number of years of potential life lost. **Premature Death** is the years of potential life lost before age 75 contributes to the total number of years of potential life lost.	
Low birthweight-Percentage of live births with low birthweight(<2500 grams)**Poor or fair health**-Percentage of adults reporting fair or poor health. This helps measure the quality of life in a county. **Poor physical health day**s-Average number of physically unhealthy days reported in the past 30 days. **Poor mental health days**- Average number of mentally unhealthy days reported in past 30 days. **Low birthweight**-Percentage of live births with low birthweight(<2500 grams)	
Adult smoking-Percentage of adults who are current smokers. **Adult obesity**- Percentage of adults that report a BMI of 30 or more. **Food environment index**-Index of factors that contribute to a healthy food environment. **Physical inactivity**-Percentage of adults age 20 and over reporting no leisure-tiem physical activity. **Access to exercise opportunities**-Percentage of population with adequate access to locations for physical activity. **Excessive drinking**-Percentage of adults reporting binge or heavy drinking. **Alcohol-impaired driving deaths**-Percentage of driving deaths with alcohol involvement. **Sexually transmitted infections**-Number of newly diagnosed chlamydia cases per 100,000 population. **Teen births**-Number of births per 1,000 female population ages 15-19	
Uninsured-Percentage of population under age 65 without health insurance. **Primary care physicians**- Ratio to population to primary care physicians. **Dentists-** Ratio of population to dentists. **Mental health providers**-Ratio of population to mental health providers. **Preventable hospital stays**-Number of hospital stays for ambulatory-care sensitivie conditions per 1,000 Medicare enrollees. **Diabetes monitoring**-Percentage of diabetic Medicare enollees ages 65-75 tgat receive HbA1c monitioring. **Mammography screening**-Percentage of female Medicare enrollees ages 67-69 tgat receive mammography screening.	

High school gradutaion-Percentage of ninth-grade cohart that graduates in fours years. **Some college -**Percentage of adults ages25-44 with some post-secendary eduation**.** **Unemployment**-Percentage of population ages 16 and older unemployed but seeking work. **Children in poverty**-Percentage of children under age 18 in poverty. **Income inequality**- Ratio of household income at the 80th percentile to income at te 20th percentile. **Children in single-parent households**-Percentage of children that live in a household headed by single parent. **Social associations**- Number of membership associations per 10,000. **Violent crime**- Number of reported violent crimes offenses oer 100,000 population. **Injury deaths**-Number of deaths due to injury per 100,000 population	
Air population-average daily density of fine particulate matterin micrograms per cubic meter. High levels of population are associated with poor heatlh outcomes such as asthma, broncitis, and poor lung function. **Drinking water violations**-Indicator of the prescence of health-related drinking water violations. These violations measures the quality of drinking water in a county. **Severe housing problems**- Percentage of households with at least 1 of 4 housing problems: overcrowfing, high housings costs, or lack of kitchen or plumbing facilites. This is a measure of housing quality and cost. **Driving alone to work**- Percentage of the workforce that drives alone to work. Indicator of poor public transit infrastructure, sedentary behaviors and low social intercations. **Long commute-driving alone**-Among workers who commute in their care alone the percentage that commutes more than 30 minutes. Indicator of poor community design to encourage active commuting.

New York State-County Opioid Quaterly Report Published April, 2017

Indicators are not mutally exclusive. Decedents and patients may have multiple substances in their system. Thus, overdoses involving heroin and overdoses involving pressciption opioid pain relievers will not add up to the overdoses onvolving all opioids.

Vital Statistics

This indicator included pharmaceutically and illicity produced opioids such as fentanyl.

SPARCS

Indicators related to hospitalizations and emergency department data used ICD-9-CM codes prior to Oct 1, 2015. ICD-10-CM codes are used from Oct 1, 2015 and thereafter. Changes should be interpreted with caution due to the chande in codes used for the definition. s=Data for indicators related to hospitalizations and emergency departments are suppressed for confidentiality purposes if there are less than 6 discharges.
Numbers displayed in the table represent only naloxone administration events reported electroniclally, therefore actual numbers of events mya be higher. He numbers for NYS excl. NYC do not include Suffolk County.
NYS e-PCR data and other regional EMS Office data collection methods
NYS Law Enforcement Naloxone Administration Database
NYS Community Opioid Overdose Prevention Naloxone Administration Database
"NOTES * Based on 10/30/16 data extract from OASAS Client Data System (CDS). - Primary client admissions only (i.e., excludes significant others). - Admissions do not necessarily represent unique persons. An individual admitted to more than one service type during the year would be counted more than once. **Primary Substance Used represents substance reported at admission as a primary substance type. - Examples of drugs in the ""Other Substance"" category include: PCP, Methamphetamine, Benzodiazepine, Ketamine, and Ecstasy."

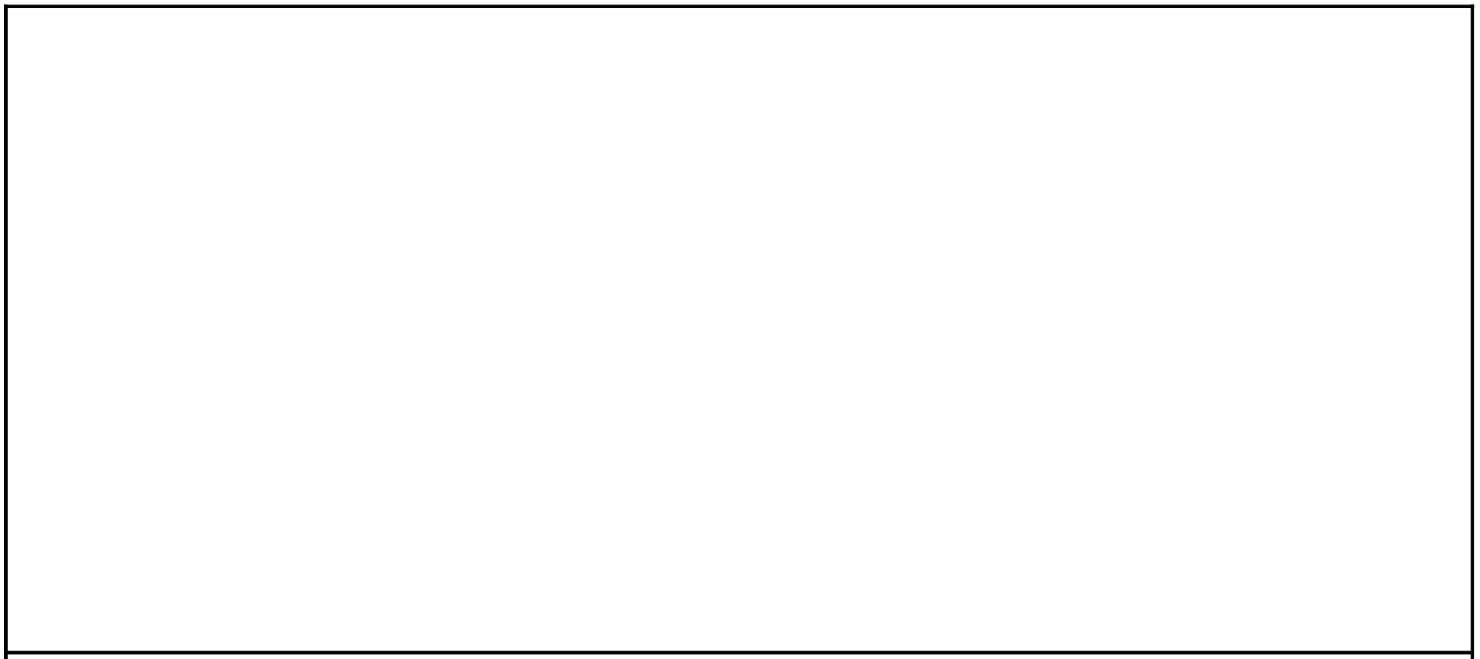
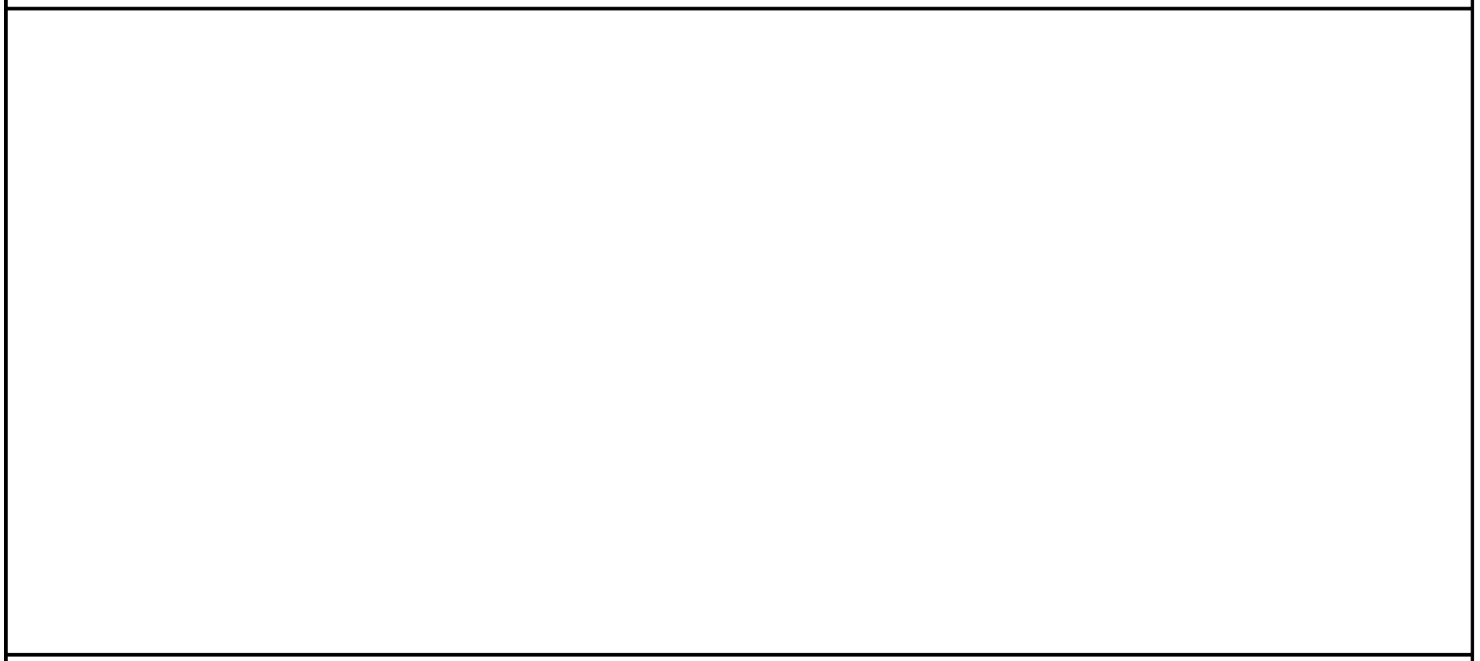
Notes and Data Sources: Data is from the NYS Department of Health All Payer Potentially Preventable Emergency Visit (PPV) database. Rates by patient county, SPARCS data 2013. Retrieved May 6, 2016 from https://health.data.ny.gov/Health/All-Payer-Potentially-Preventable- Emergency-Visit-/f8ue-xzy3#About

http://www.countyhealthrankings.org/app/new-york/2017/overview





Notes

The ten New York State counties with the greatest number of people living in poverty, from highest to lowest, are: Kings, Bronx, Queens, New York, Erie, Monroe, Suffolk, Westchester, Nassau, and Onondaga. The ten counties with the highest percentage of the population living in poverty, from highest to lowest, are: Bronx, Kings, Franklin, Montgomery, St. Lawrence, Tompkins, Chautauqua, Cattaraugus, Oswego and New York.

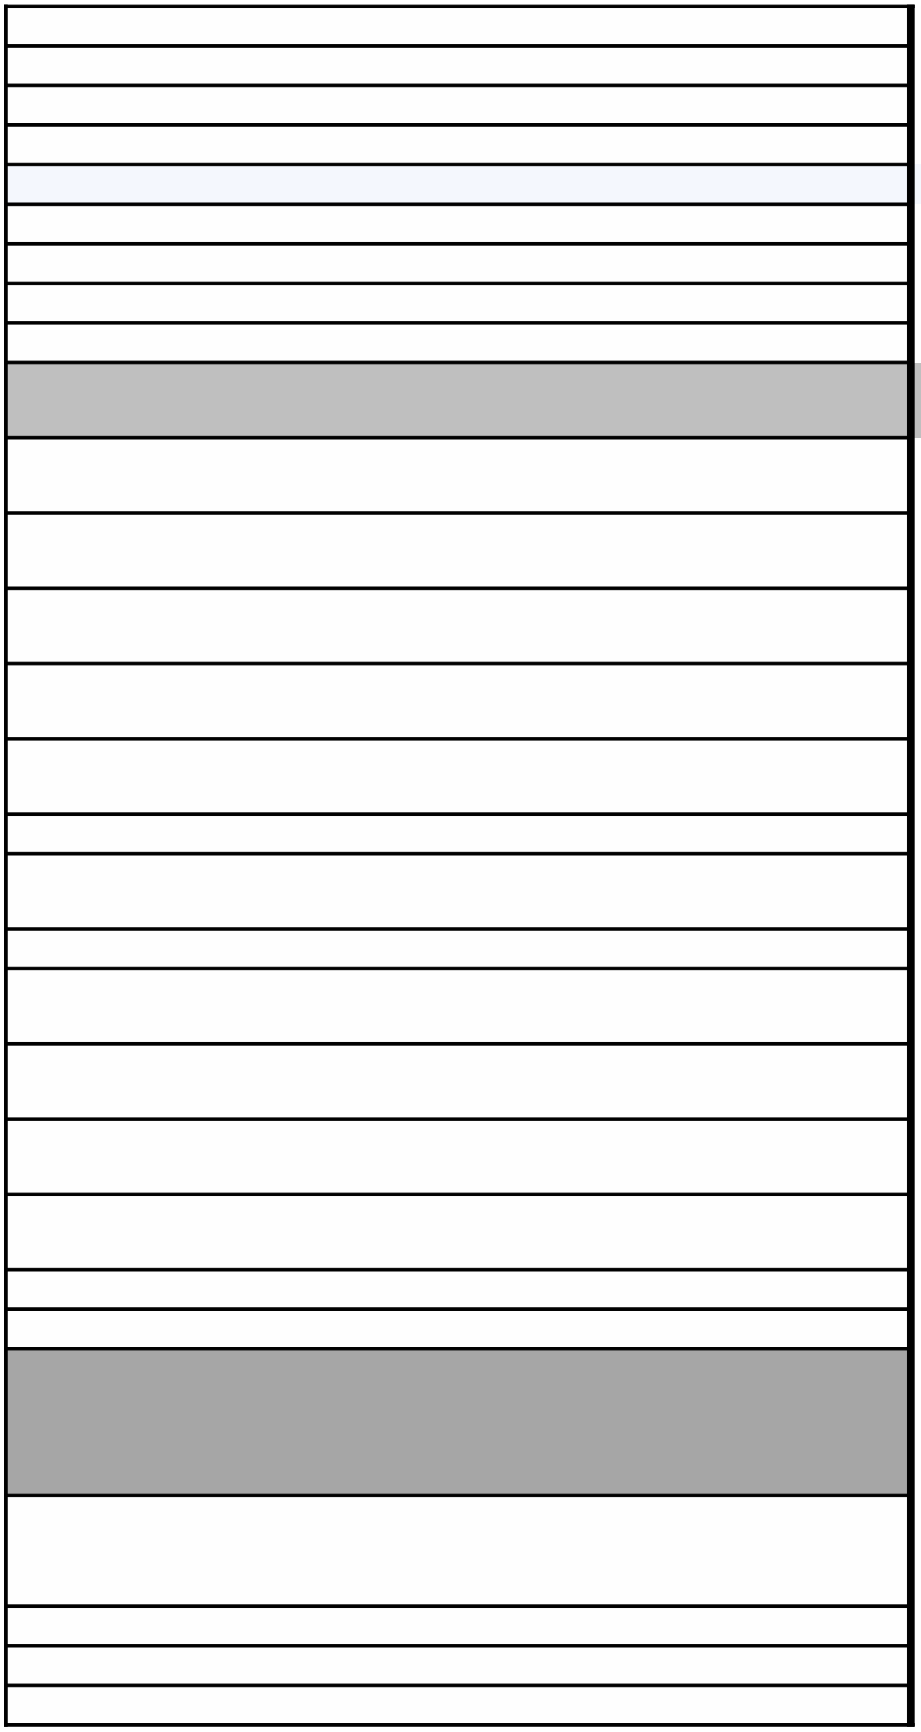
Office of Management and Budget definitions: **Small metro**-Counties in MSAs of populations less than 250,000 **Medium** **metro** - Counties in MSAs of populations of 250,000-999,999 **Large** **central metro**-Counties in MSAs of 1 million or more population **Micropolitan**- Counties with populations at less 10,000 but less than 50, 000
Totals from Birth-65+
NYS Opioid Poisoning, Overdose and Prevention 2015 Report to the Governor and NYS Legislature

and prescription opioid misuse https://ww

Numbers reported by law enforcement and registered COOP programs to the NYSDOH AIDS Institute. The actual numbers of naloxone administration events may be higher.

Totals across all drugs: Heroin, other opioids, alcohol, crack/cocaine, marijuana, other substance

This report displays summary information about the selected county and NY State annual Medicaid expenditures for mental health services provided to adults and children who were Medicaid eligible on the date of service within 2014 and prior Local Fiscal Years (Calendar Year for all counties except New York City; July 1, 2013 - June 30 2014 for NYC counties).



All rates are calculated based on the US Census Bureau's 2010 decennial census estimates, based on 100,000 population Source: SPARCS, July 2015. Prepared by NYSDOH, AIDS Institute ** Caution: Rates calculated using frequencies of less than 20 (five-year total) are unstable. Source:NYSDOH, Bureau of Occupational Health and Injury Prevention Vital Statistics Death File, June 2015, www.health.nygov/prevention/injury_preventation

All rates are calculated based on the U.S. Census Bureau's 2010 decennial census estimates, based on 100,000 population. Source: SPARC July 2015. Prepared by NYSDOH, AIDS Institute

2018 Community Planni

Areas of Concern
What improvements, innovations, services and supports are most in need to enhance the wellness of Onondaga County residents related to Developmental Disabilities, Mental Health, Substance Use conditions or other concerns?

New models of affordable housing - affordable with supports, but less expensive than current models http://www.wesoldieron.org/projects/New models of affordable housing - affordable with supports, but less expensive than current models http://www.wesoldieron.org/projects/
Housing
Not enough housing for persons w/MH & MH/Forensic pop workforce (comm based supports)
Safe and affordable housing, better code enforcement and tracking of Landlords and related LLC companies to avoid re selling via land bank.
housing- affordable
Housing for emergency, transition, permanentHousing for emergency, transition, permanent
residential options for folks with Developmental Disabilities who require 24/7 staffing
HOUSING IS A BIG PROBLEM IN THIS COUNTY
Appropriate kinds and levels of housing pose ongoing problems for our citizens in need - emergency, transition, permanent, 24 hr care for those in need.
Single women supportive (transitional/permanent)housing
Homeless Women (coming out of jail; impatient treatment facilities; Domestic violence situations)
Women's with children supportive(transitional/permanent) housing
Increased community policing at and around the Rescue Mission and Syr. Housing Authority projects.
Housing
Sustained supports for homeless population enabling them to set out of shelter and not return (Approx. 4000 per yr.)
Strengthern economic/job/housing opportunities for those with SA and or MH issues
New models of shared housing. Single apartments are too expensive and isolating. Need co-ops etc.

Higher level work opportunities/volunteers for individuals with disabilities
Incentives for moving from DSS assistance to employment by offering actual jobs through Jobs Plus in exchange for an increased benefit, possibly cleaning up the city trash and overgrowth.
More State/County funding for peer service community work
Strengthern economic/job/housing opportunities for those with SA and or MH issues
Find funding for DD providers to stop alarming turnovers

Employment

ɔment/Training

Workforce development, pay
Training and ongoing supervision/support for "peer services"
More qualified Behavior Intervention Specialists (qualification per regulations promulgated 2012/2013). The qualifications are difficult to find and behaviors supports cannot be provided without it.
Provide workforce training in social determinants of health (particularly poverty) and their impact on those we serve with regard to access to and sustainability of services/supports.
Training of Professional Doctors on Special Needs people
Direct care workforce-salaries & training
Education-continued for providers
Mandatory administrative training in hospitals and treatment centers on peer support
Increased primary prevention education-need increase staff
Workforce shortage - especially direct support, teaching assistants, personal care aides. We need both higher salaries and better training.

Teaching Sign Language to professional individuals
Education programming for individuals who dropped out of HS

Increased community policing at and around the Rescue Mission and Syr. Housing Authority projects.
Blue light warning system to alert for difficulties/ decompensation in community
Employment opportunites/living wage for support providers
Increased collaboration with law enforcement and SUD/Behavior health peers working as such
Significant shift in police attitudes and training, and possibly laws. Much more de-escalation; crisis teams with police & MH counselor. Too many people in Justice Center!!
Changes in law inforcement of alcoholism and addictions. Stop locking up sick people and treating them like criminals
ALL OF THESE AREAS NEED TO BEEN ADDRESSED IN A BETTER MANNER IN ORDER TO MAKE SYRACUSE A MUCH BETTER PLACE TO LIVE AND PEOPLE CAN FEEL SAFE YES THAT IS THE ONE THING I DO NOT SEE ON HERE IS SAFTEY

Strengthen 'ombudsperson' and 'consumer protection' role so that once private, for-profit, managed care companies rule the world there will somewhere for people to turn
A new policy for maintenance of sidewalks that actually results in repairs and enforcement, and way more public trash cans throughout entire city.
Prepare and respond to the "Raise the Age" legislation in anticipation of the increase in identified youth with mental health and substance abuse issues

ɑtment

It is not easy to find qualified counseling services for families of children with severe behavioral needs. Funding for family supports is also an issue.
More free or low-cost psychiatric services for children and adolescents
Increased/ improved psychiatric services
Mental health services are lacking in this county
Psychiatry
Need more mentoring/skillbuilding services (MH)
Integrated emergency services available to all mental health areas
Adult respite/drop-in center-low-key social-not yet in MH crisis but needing "home supports"
Available "stash" of supplies for (drop in place; for 6 at cup of coffee, etc) "street" mental health folks-basic needs leading to trust relationships
School options w/psychiatry new day treatment options

r Treatment

There is an epidemic of opioid abuse/addiction that needs to be addressed by better preventive care, treatment, and family intervention.
More slots for in-patient and out-patient substance abuse treatment
Not enough detox facilities ready to accept people when they're ready. Waiting for a detox bed isn't an option for people ready to go into treatment.
building, what unacceptable behavior is, why to be non judgements.
detection while lessening laws on Cannibus use.
Detox
Addiction services expansion
Buddy or peer system to support those waiting for rehab-check-in, follow through system
Opiod epidemic

Peer Services need to expand
Resources-Peers are important
Peer run respite

al Services

There needs to be better coordination of behavioral healthcare with physical healthcare.
Quality dental care 7 days a week in multiple locations. Dental care is an unmet need because most families and individuals resources is spent on meeting basic needs e.g. food, shelter clothing etc.
Health Outreach to vulnerable populations
Primary care access: need non-traditional hours

Transportation
Transportation
Transportation
Transportation outside the city. How do we not concentrate poverty when we can only place people without transportation in the city?
Need for improved transportation services in order for commuity residents to have easy access to all support services
Better transportation system

Prevention/Wellnes
Community Wellness calendar=Listing all opportunities each month
Increase access to prevention live services system wide increase crisis response
Access to a single stream P.O.S. for wellness

Youth Services
Services for Transition Age Youth
Care Coordination for Non-Medicaid eligible children
If new service array comes into play (SPA & HCBS) we need to ensure some array for Non-Medicaid eligible kids
If new service array does not, we need those services to ensure kids successful in home, school, & community.
Increased MH & HH supports for students through school in Onon Co. Onondaga PZ
More prevention/awareness child & adolecent MH issues
More free or low-cost psychiatric services for children and adolescents

Alateen for teenage kids that have a parent with addiction. The need of learning acceptance, self esteem building, what unacceptable behavior is, why to be non judgements.
Expansion of childrens services for developmental disabilities
Expansion of mental health options for children
Engage students at middle-school ages
Increase in Crisis Respite resources and/or the creation of a "Crisis Center" for children/youth that enables parents to address issues/concerns before they reach the level of CPEP/ER intervention.
Expand school based servicesExpand school based services
More prevention/awareness child & adolecent MH issues
Childcare often not available to allow individuals to seek treatment
Establish a more effective community response to child/youth presentations that spark the debate of it being "behavioral vs. psychiatric" and often results in "cracks" in the system and youth not getting the help they need

Other Services
More intensive services
Support groups for different demographics now/currently severely lacking
Sorting out funding & reimbursement models for DD and family populations
Increased community awareness & understanding of the signicant role secondary & tertiary prevention plays in wellness
Communicating with the provider/community}Raise awareness by 211 (hot line), social media, app
Aging caregivers
Selfcare for caregivers (not just respite)i.e. parent to parent fellowship workshops, day trips
How to help agency with possible changed in the ACA
Reduce poverty
Improve access to care- Front Door
Worksite wellness programs to enhance mental as well as physical heatlh
Managed care/payment charges, value based payment (medicaid & non-medicaid)
Access -what -where -how
Access to solution based services=crisis/short & long term
More options/level of care options to avoid crisis intervention need for

Intergration of Service
A holistic approach to treating addiction and mental illness
Regulatory reform: Health, DD, MH and SA still have different rules that force providers into silos
Better integration of developmental disabilities with mental health/substance abuse, etc.
Services need to be structured to meet the needs of the family as a unit. When one member is struggling, ill or in crisis it effects everyone in the household.
A holistic approach in providing treatment that is centrally located and interconnected. Lessen the burden of repeatedly supplying same information to multiple providers
A holistic approach in providing treatment that is centrally located and interconnected. Lessen the burden
Increased collaboration with law enforcement and SUD/Behavior health peers working as such
Establish a more effective community response to child/youth presentations that spark the debate of it being "behavioral vs. psychiatric" and often results in "cracks" in the system and youth not getting the help they need

Expand the current school-based efforts in the city (e.g. school-based health & mental health clinics, placement of child welfare liaisons, etc.) to a county-wide scope.
Rehabilitation Center for Special need services
Access to Psychiatric services for individuals with dual diagnosis of IDD/MH with a primary diagnosis of IDD.
Mobile Crisis teams to support certified IRA's (OPWDD residential services) for individuals with dual diagnosis of IDD/MH (instead of CPEP).
School options w/psychiatry new day treatment options
Wrap around services for mothers and children living in poverty
Access to services for individuals that don't qualify for in home services due to living in a certified IRA. Example: specialized nursing care, nutritional counseling, in home OT/PT services, etc
How best to approach individuals sub. abuse & mental health related issues in a coordinated manner. How best to approach individuals sub. abuse & mental health related issues in a coordinated manner.
Not enough or adeq.svcs for persons (aging parents) w/DD & MH
Strengthern economic/job/housing opportunities for those with SA and or MH issues
Improved linkage of Temporary Assistance "Exempt" population with appropriate community resources-enabling them to work and/or improved wellness. Exempt -conditions preventing them to work (Approx. 2000 adults)
Heatlh Home roll out/waiver connect to HH increased M-HS Seven Challenges-adolescent SU specific MH foster care population
Increase regional partership & collaboration
Business community needs to be considered "providers"& important professionals in wellness roles! Businesses interface with MH, SU & DD communities very often.
